Descriptive Analytics Report: Nykaa Purchase Behaviour at Scale

Objective

This report analyzes a synthetic Nykaa sales dataset covering 2019–2025. The objective is to understand product demand, customer ratings, annual sales movement, regional performance, pricing, profitability and product–region revenue drivers.

- What are the best-selling Nykaa products by volume?
- How are products rated, and which products have the highest and lowest average ratings?
- Which year recorded the highest sales volume?
- Which region generates the highest total unit sales?
- What is the average retail price by region?
- Which region is most profitable per unit sold?
- Is total sales volume growing or declining from 2019 to 2025?
- Which product–region combination is the biggest revenue driver?

Dataset note: The figures in this academic report are synthetic and are intended for descriptive-analytics demonstration. They should not be treated as Nykaa's audited financial or operational figures.

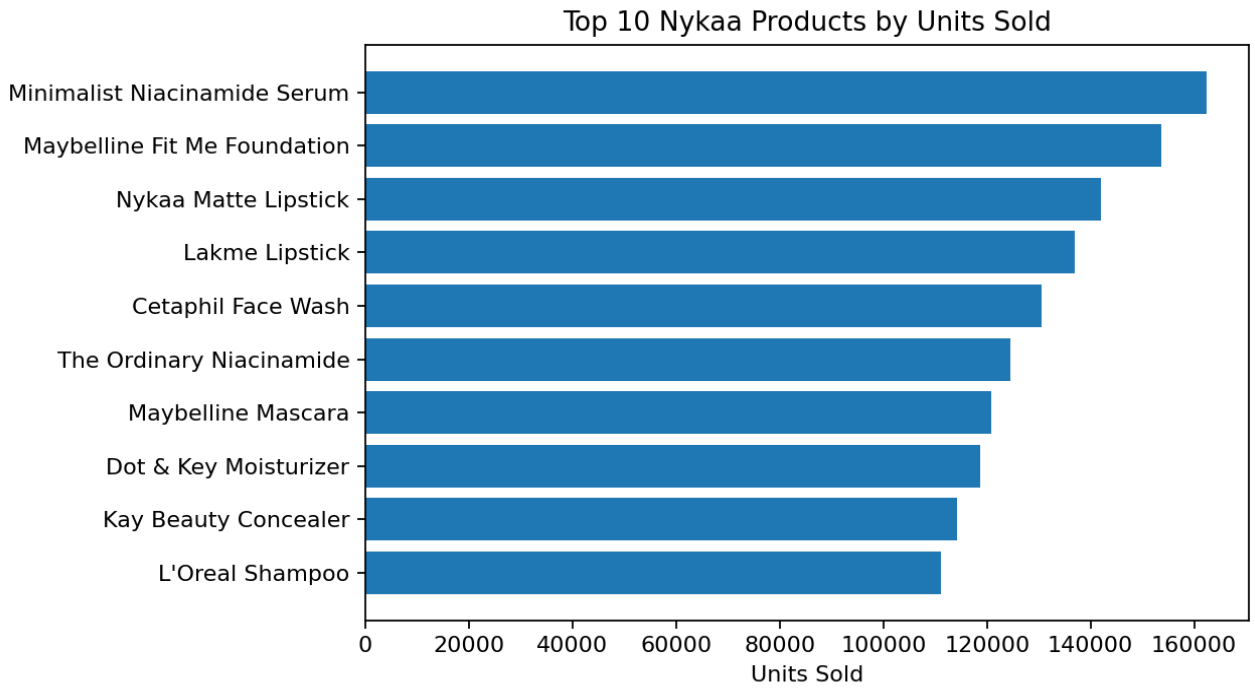

How This Would Work at Real Scale

Layer	Purpose	Typical tools
Investigation	Explore raw dataset, column types, missing values and ranges	pandas, df.info(), df.describe()
Storage	Hold data for repeated analysis and sharing	CSV / Excel / database
Batch aggregation	Compute yearly sales, average ratings, revenue and profit by region/product	pandas groupby, pivot_table
Serving / BI	Present KPIs and charts	Matplotlib, Excel, PDF / BI dashboard

Dataset scale used in this report

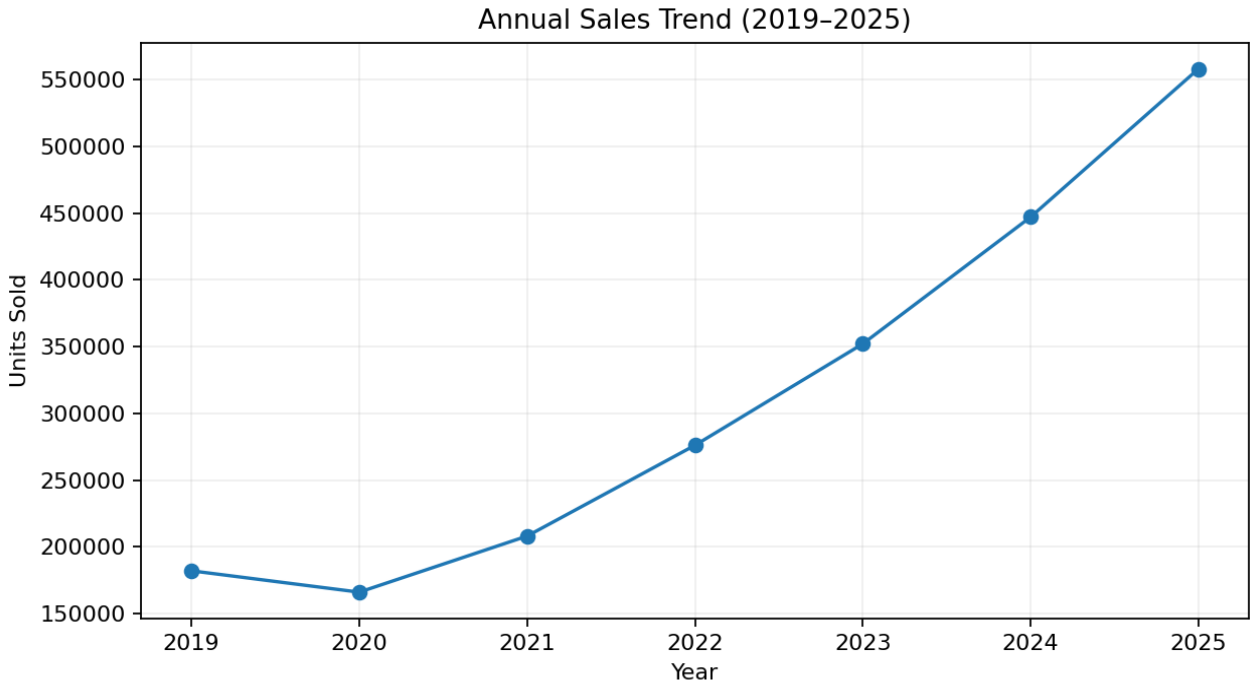

Dimension	Value
Years tracked	2019–2025
Products tracked	20
Regions tracked	4
Product-region-year records	560
Total units sold	~2.19 million
Rating scale	5

Best-Selling Products

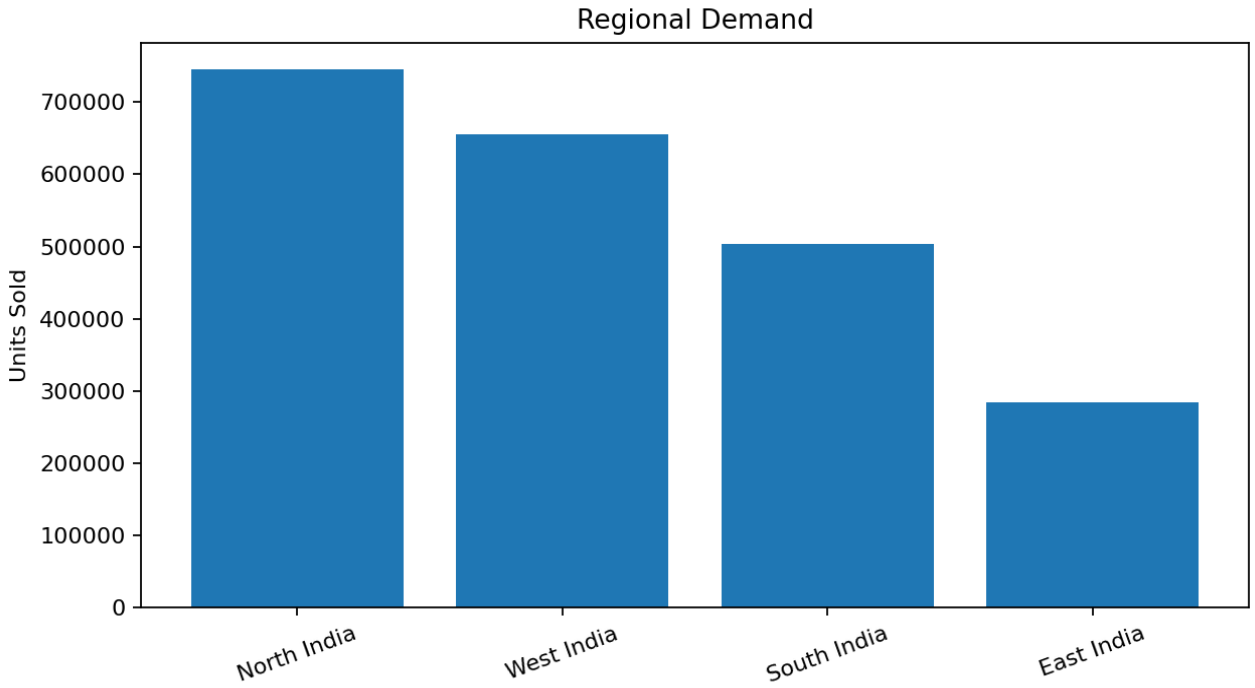

The highest-volume product in the synthetic dataset is **Minimalist Niacinamide Serum**, with approximately **162,437** units sold. The next major volume contributors are Maybelline Fit Me Foundation and Nykaa Matte Lipstick. Demand is concentrated among popular makeup and skincare products, showing the importance of high-frequency beauty essentials.

Annual Sales Trend

The synthetic annual trend shows a temporary decline in 2020 followed by continuous recovery and expansion. Units increased from about 182,000 in 2019 to 558,000 in 2025. Thus, 2025 is the highest-selling year in the dataset.

Regional Demand

North India is the leading region by total units in the synthetic dataset, followed by West India, South India and East India. The ranking remains broadly consistent across the seven-year period, indicating a stable regional demand structure.

Pricing and Profitability

Region	Avg Price (■)	Profit / Unit (■)	Units Sold
North India	612.77	114.33	744,940
West India	599.75	117.66	655,272
South India	632.25	130.39	503,866
East India	654.82	147.79	284,922

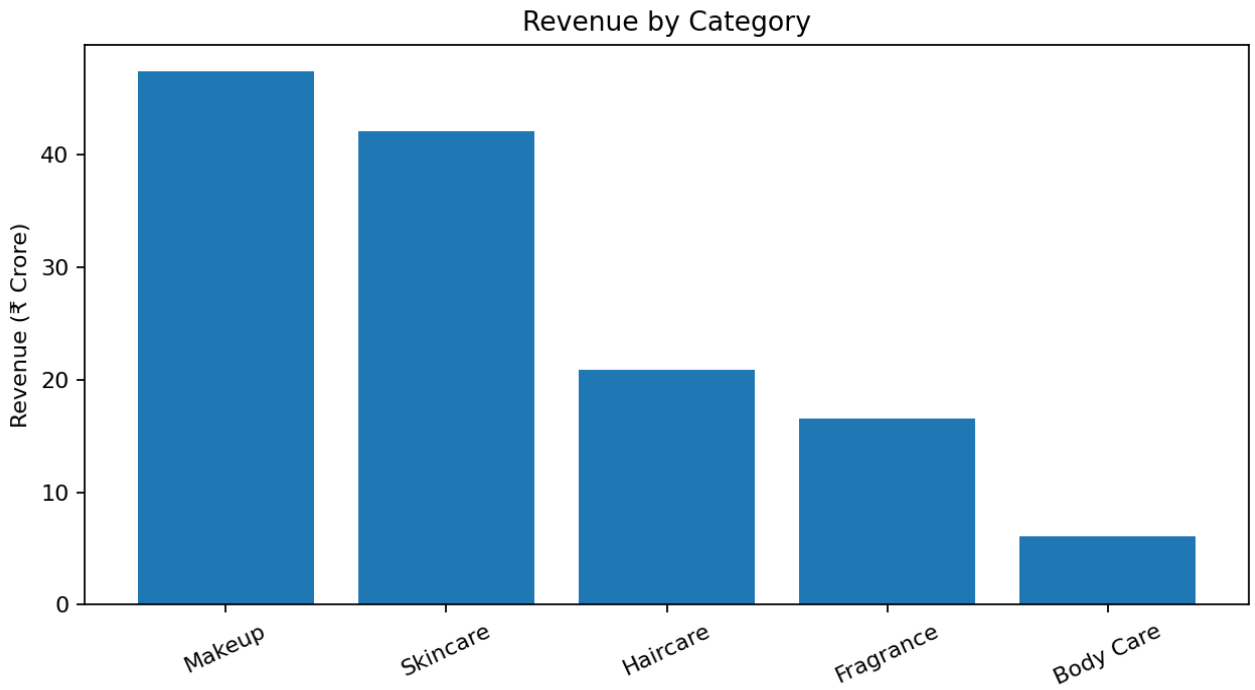

East India records the highest average retail-price level because of the regional price multiplier used in the synthetic dataset. It also has the highest modeled profit per unit. North India, however, remains the volume leader. This illustrates how the highest-volume region and the highest-profit-per-unit region can differ.

Rating Distribution

The average product rating is approximately **4.19/5**. The highest average rating is recorded by **Bath & Body Works Mist** at approximately 4.34, while the lowest is **Insight Highlighter** at 4.05. Ratings remain within a relatively narrow range, indicating broadly consistent customer satisfaction in the synthetic data.

KPI	Value
Average Product Rating	4.19 / 5
Highest Product Rating	4.34 / 5
Lowest Product Rating	4.05 / 5
Rating Range	0.29
Rating Scale	5

Revenue and Profit

The Ordinary Niacinamide is the largest revenue contributor in the synthetic dataset, generating about ■10.69 crore. The strongest product–region combination is **The Ordinary Niacinamide – North India**, with approximately ■3.61 crore in revenue. This demonstrates the difference between volume leadership and value leadership.

Summary of Key Metrics

Metric	Value
Total units sold (7 years)	2,189,000
Total modeled revenue	■132.97 Cr
Total modeled profit	■27.01 Cr
Average product rating	4.19 / 5
Top volume seller	Minimalist Niacinamide Serum
Top revenue seller	The Ordinary Niacinamide
Leading region by volume	North India
Highest profit/unit region	East India
Products tracked	20
Regions tracked	4

Next step: Descriptive analytics can be extended into predictive analytics using sales forecasting, demand prediction, revenue forecasting and rating-trend monitoring.

Key Findings

• Minimalist Niacinamide Serum is the volume leader, with approximately 162,437 units.

• The Ordinary Niacinamide is the revenue leader, showing that the highest-volume and highest-revenue products are not necessarily the same.

• Annual sales rise from 182,000 units in 2019 to 558,000 units in 2025, with a temporary 2020 dip.

• North India leads the regional volume ranking, while East India has the highest modeled profit per unit.

• The average product rating is approximately 4.19/5, indicating broadly stable satisfaction in the synthetic dataset.

• The Ordinary Niacinamide × North India is the strongest product–region revenue combination.

Recommendations

• Protect inventory and availability for Minimalist Niacinamide Serum, the strongest volume driver.

• Maintain strong stock and promotional visibility for The Ordinary Niacinamide, the leading revenue contributor.

• Use regional demand patterns to plan inventory allocation and reduce stock-out risk.

• Monitor product ratings over time and investigate sustained declines rather than reacting to small short-term changes.

• Evaluate pricing and margins by region because higher prices can produce stronger profit per unit even when total volume is lower.

• Use the product–region revenue table to prioritize high-value combinations for campaigns and assortment planning.

Academic Note

This report is modeled on the structure and analytical framing of the supplied Haldiram reference report. The Nykaa numbers are synthetic for academic descriptive-analytics practice and are not claims about Nykaa's actual business performance.

Appendix: Product Summary

Product	Units Sold	Avg Rating
Minimalist Niacinamide Serum	162,437	4.304
Maybelline Fit Me Foundation	153,661	4.218
Nykaa Matte Lipstick	142,029	4.248
Lakme Lipstick	137,007	4.178
Cetaphil Face Wash	130,620	4.204
The Ordinary Niacinamide	124,501	4.291
Maybelline Mascara	120,875	4.206
Dot & Key Moisturizer	118,676	4.249
Kay Beauty Concealer	114,223	4.274
L'Oreal Shampoo	111,063	4.194
Plum Green Tea Toner	105,451	4.164
Mamaearth Face Wash	97,385	4.083
Nivea Body Lotion	94,844	4.147
Tresemme Keratin Shampoo	92,724	4.114
Nykaa Naturals Hair Serum	90,549	4.182
Dove Body Wash	89,720	4.128
Mamaearth Onion Hair Oil	83,517	4.068
Nykaa Wanderlust Body Mist	81,532	4.254
Insight Highlighter	76,723	4.049
Bath & Body Works Mist	61,463	4.341
